A DISCRETIZED METAMATERIAL DESIGN
CANDIDATE LIBRARY
90,245 stored unit cells
15 choices at each active cell
168 independent cloak cells
TARGET + LOADING
Match exterior displacement
Fixed mask and reference
B COMPLEMENTARY PROPOSALS
NUMERICAL TOOL
Calibrate scores
Nominate a numerical repair
RESPONSE AGENT
Compose + ablate
Learn which changes help
INTERFACE AGENT
Match + extend interfaces
Test compatible cell groups
SHARED LOG: incumbent | predictions | measured successes + failures
C
COORDINATOR
Diversify / validate / commit
3 fresh proposals; up to 4 swaps each
HASH
FULL-RESOLUTION FEM
Solve equilibrium
Measure the masked loss
RETAIN ONLY IMPROVEMENTS
Update the design; record every outcome
10 rounds x 3 new FEM evaluations per method
MEASURED FEEDBACK
